The diagram illustrates the structure of a ProsavisGO file, which is a text-based format for storing patient data. It is divided into two main sections: a header and a data section.

Header Section:

- Title:** A line starting with a colon (:) followed by the title of the file.
- Date:** A line starting with a colon (:) followed by the date of the data collection.
- Version:** A line starting with a colon (:) followed by the version number of the file.
- Description:** A line starting with a colon (:) followed by a brief description of the data.

Data Section:

- Table:** A table with columns representing various patient parameters. The columns are: ID, Name, Age, Sex, Height, Weight, BMI, Blood Pressure, Heart Rate, Respiratory Rate, Oxygen Saturation, Temperature, Pulse, Respiration, Blood Sugar, Blood Cholesterol, Blood Triglycerides, Blood Glucose, Blood Urea Nitrogen, Blood Creatinine, Blood Lactate, Blood Ammonia, Blood Bilirubin, Blood Alanine Aminotransferase, Blood Aspartate Aminotransferase, Blood Gamma-Glutamyl Transaminase, Blood Alkaline Phosphatase, Blood Lactate Dehydrogenase, Blood Creatine Kinase, Blood Troponin, Blood Myoglobin, Blood Ferritin, Blood Transferrin, Blood Transferrin Receptor, Blood Transferrin Receptor-2, Blood Transferrin Receptor-3, Blood Transferrin Receptor-4, Blood Transferrin Receptor-5, Blood Transferrin Receptor-6, Blood Transferrin Receptor-7, Blood Transferrin Receptor-8, Blood Transferrin Receptor-9, Blood Transferrin Receptor-10, Blood Transferrin Receptor-11, Blood Transferrin Receptor-12, Blood Transferrin Receptor-13, Blood Transferrin Receptor-14, Blood Transferrin Receptor-15, Blood Transferrin Receptor-16, Blood Transferrin Receptor-17, Blood Transferrin Receptor-18, Blood Transferrin Receptor-19, Blood Transferrin Receptor-20.
- Footer:** A line starting with a colon (:) followed by the total count of records and a summary of the data.
